

CODE REVIEW REPORT

Generated: 2025-12-05 10:43

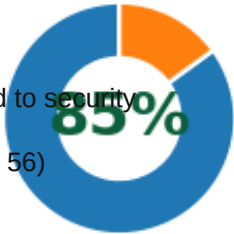

Author: lakshay | Project: Stock Data Management

Strengths

- ✓ Uses exception handling for database connection and data insertion.
- ✓ Fetches stock data from a reliable API.

Flaws / Issues

- ✗ [HIGH] Hardcoded API token and MongoDB URI can lead to security issues. (line 6)
- ✗ [MEDIUM] No validation for user input stock symbol. (line 56)

Correct
Issues

Score: 85/100

MEDIUM RISK

Executive Summary

The code successfully connects to MongoDB and fetches stock data from an API, but has security and validation issues.

Code snippet preview:

```
import requests
import pymongo
import datetime
```

```
# MongoDB URI (Replace with your credentials)
mongo_uri = "your_mongodb_connection_string"
```
